

## Testimonial from Spearhead

We as manufacturers of the highest quality radio controlled large scale model tanks are totally dependant of the skills and abilities of all of the manufacturers who produce components and sub assemblies on our behalf.

Our requirements are complex, difficult to manufacture and totally set the quality for the remainder of our models.

We have found DB Sheetmetals Ltd to be the most tenacious company that we have ever met in getting the product 100% correct and at a price that is both fair and reasonable. The knowledge base of DB Sheetmetals Ltd is such that following their advice; both costs and production times have been reduced and have as a result created a better product than we ourselves had originally designed.

The personalities of DB Sheetmetals Ltd make the relationship between us a mutually beneficial partnership rather than that of the usual client and manufacturer, most unique and appreciated in this day and age.

**We cannot as a company recommend DB Sheetmetals Ltd highly enough.**
